

— DIGITAL TRANSFORMATION CONSULTANT

I help CEOs and decision-makers do digital better.

I bring 13 years inside global agencies, plus the experience, creativity, and hands-on knowledge to help you, the decision-maker, make sharper digital-first calls. Not another vendor executing tasks — a partner who sharpens how you decide.

DIGITAL TRANSFORMATION

AI & AUTOMATION

WEB DEVELOPMENT

CRYPTO & BLOCKCHAIN

Instead of Crypto & Blockchain, “Marketing & Business Solutions”

WHO YOU'D BE WORKING WITH

A strategist, not a subcontractor.

I'm Joe Flores — known around the industry as **Daddy FunBuckets** — a digital marketing veteran with 13 years in the trenches of global advertising, including time on the social media teams at McCann Erickson and Ogilvy. I've since built DFB Digital around a simple idea: businesses deserve agency-caliber strategy without the agency-sized overhead.

Today my focus is digital transformation — helping brands rethink how they market, sell, and operate using modern tools, smart automation, and AI-powered systems. I'm also a hands-on crypto and blockchain enthusiast, which means I understand where digital commerce is heading, not just where it's been.

This page is your direct line to me — no account managers, no hand-offs. You scanned the code, you get me.

Digital Transformation

Marketing Strategy

Web Development

AI Business Automation

1. Who You'd Be Working With

A digital-first architect, not a traditional marketer.

2. Most executive teams aren't doing digital—they're just running print-era playbooks on shiny new platforms.

I'm **Joe Flores** (aka **Daddy FunBuckets**), and I help founders and CEOs dismantle traditional marketing habits to instill a true digital-first infrastructure. Together, we arm your business with the AI, funnels, and foundational frameworks needed to lead markets rather than constantly play catch-up.

3. Remove everything else (This page is your direct line to me...; Digital Transformation, Marketing Strategy, etc)

WHAT I HELP WITH

Four ways I move your business forward

Every engagement starts with a conversation about where you actually are —
then we pick the lever that matters most.

Digital Transformation Consulting

A clear-eyed audit of your current operations and a practical roadmap to modernize them — no jargon, no bloated frameworks.

Digital Marketing Strategy

Agency-level positioning, channel strategy, and campaign planning, sized to your budget and built to be executed by your own team.

Web Development

Fast, mobile-first websites and landing pages designed to convert — not just look good on a pitch deck.

AI & Business Automation

Practical AI systems that cut busywork out of marketing, sales follow-up, and operations — implemented, not just recommended.

1. Remove “Every engagement starts with a conversation about where you actually are — then we pick the lever that matters most.”
2. Keep everything else as is (*note: this section is brilliant!*)

HOW AN ENGAGEMENT WORKS

Simple, transparent, no wasted motion

01 — Discovery Call

Discovery Call

A focused conversation about your business, your goals, and where things are getting stuck.

02 — Audit

Audit

I review your current marketing, web presence, and operations to find the highest-impact opportunities.

03 — Roadmap

Roadmap

You get a clear, prioritized plan — what to fix first, what to automate, and what to build.

04 — Execution

Execution

We implement together, with me directly involved from strategy through delivery.

"Joe delivers a proven digital strategy that will grow your business. I give him my highest marks."

Joe Flores is a highly competent, creative and thoughtful digital strategist who has extensive corporate experience. From idea to strategy to digital execution in B2B or B2C cycles, he will work with you to achieve and exceed your targeted outcomes. I would highly recommend working with Joe sooner rather than later, to position your digital strategy much earlier than you might think necessary. I've learned one of the biggest mistakes you can make is to leave your digital plan for later — it's actually one of the most important early things you can do.
